WORK EXPERIENCE

Cloudpay Technologies Pvt Ltd - Faridabad

Software Developer

Apr 2024 - Present

- Worked on refactoring an existing HRMS system, originally built with ASP.NET, upgraded **using Angular, .NET Core Web API, and SQL Server**, improving code maintainability and overall system performance.
- Developed responsive UI components using Angular, **enhanced user experience** and interface consistency.
- Collaborated with a team of 4 to **redesign, create, and enhance RESTful APIs** using **.NET Web API**, ensuring **seamless communication between frontend and backend**, while also supporting **both web and mobile applications** with consistent data flow and smooth cross-platform integration.
- Optimized database queries in **SQL Server Queries**, reducing query response time by up to **30%**.
- Developed **custom HRMS modules tailored to specific client requirements**, ensuring timely delivery through clear and proactive communication.
- Designed and implemented **approval workflows** and detailed **report modules**, enabling real-time insights and approvals for HR and management teams.

EDUCATION

Maharshi Dayanand University – Rohtak HR

Bachelor of Computer Application (BCA) (2023)

Board of School Education –Bhiwani HR

- 12th Senior Secondary School (2020)
- 10th Secondary School (2018)

PROJECT

- Refactored and modernized an existing HRMS system from **ASP.NET Web Forms** to **Angular, .NET Web API & SQL Server** improving system performance, maintainability, and user experience.

Developed and enhanced multiple HRMS modules including:

- **Leave Management** with dynamic workflows for employee, HR, manager and supervisor-level approvals.
- **Attendance Module** for fetching, regularizing, and reporting attendance with business rules.
- **Reimbursement Module** with multi-step approval logic and amount validation.
- Designed and implemented the **entire Recruitment Process, including job posting, candidate tracking, status updates, and final hiring**.
- Created and managed **Salary-related functionalities, including salary breakdown logic** and file-based views (PaySlip, Form16, IT Computation, YTD Pay).
- Built **dynamic approval flows using configurable business logic** for different organization structures.
- Developed **file handling features such as upload, retrieve (view), and delete** for documents like resumes, payslips, and salary files.
- Implemented **custom reports and dashboards** for HR and management with filters, exports, and role-based access.
- Refactored and optimized existing **SQL queries and stored procedures** to improve performance and ensure data accuracy.

SKILLS

- **Languages:** Html, Css, JavaScript, TypeScript
- **Libraries:** Bootstrap, JQuery
- **Framwork:** Angular
- **Backend:** Dot Net Core, MS Sql Server & Sql
